# Child (0-14 Years Old) Road Casualties 1997 – 2006

## Overview

Over the ten year period, 1997-2006, 198 children (0-14 years old) have been killed on our roads. An additional 855 children were seriously injured.

43 per cent of child casualties killed in the period 1997 to 2006 were pedestrians. Of all child casualties who were seriously or slightly injured in the period 1997 to 2006, 54 per cent were car passengers. 59 per cent of children killed were male.

Peak time for children to be killed on the road is during the hours of 3:00 p.m. – 7:59 p.m. Children are more likely to be killed during the summer months, with June and July having the most fatalities.

The child fatality rate per million population has decreased by 40.6 per cent from 1997 to 2006.

**Other Key Facts:** Since 1997 there has been

- 40.7% reduction in the number of children 14 years of age or younger killed on our roads compared to 2006.
- 51.5% reduction in the number of children 14 years of age or younger injured on our roads compared to 2006.

Broken down by road user category there has been;

- 45.5% decrease in pedestrian fatalities
- 100% decrease in cyclist fatalities
- 18.2% decrease in car passenger fatalities

# WHEN CHILDREN (0-14 YEARS OLD) ARE KILLED

In the period 1997-2006, there were 198 child fatalities, of which 116 (59%) occurred during the hours of 3:00 p.m. – 7:59 p.m. 48 per cent of children were killed or seriously injured on Friday, Saturday and Sunday. Just under half were killed during the months of May through September, with June and July having the most fatalities.

## WHERE CHILDREN WERE KILLED AND SERIOUSLY INJURED

In the period 1997-2006, 61 per cent of child fatalities occurred outside a built up area (i.e. on roads with posted speed limit more than 60km/h). 57 per cent of all children (0-14 years old) injured were inside built up areas. 44 per cent of all child (0-14 years old) fatalities occurred in county Dublin, Cork, Galway, Kildare and Wexford. Broken down by percentages of the five counties having the highest number of child fatalities in the last ten years are:

- Dublin with 15 per cent of the total number of children killed and 19 per cent of killed and seriously injured in the last ten years
- Cork with 11 per cent of the total number of children killed and 12 per cent of killed and seriously injured in the last ten years
- Galway with 6 per cent of the total number of children killed and 5 per cent of killed and seriously injured in the last ten years
- Kildare with 6 per cent of the total number of children killed and 4 per cent of killed and seriously injured in the last ten years
- Wexford with 6 per cent of the total number of children killed and 6 per cent of killed and seriously injured in the last ten years

# INTERNATIONAL COMPARISON

In 2004, Ireland had the lowest child road fatality rate per million population among the EU 15 (8 deaths per million). This rate has increased to 19 from 2004 to 2006. Comparing with the EU 15 member states the 2006 rate is not encouraging. However the 2006 rate represents 40.6 per cent reduction in child deaths per million populations compared to 1997 rate of 32
